For internal use only.

Accepted by: _____ Date: _____

Cost: _____ Paid: _____ Date: _____

Installation Date: _____

BENCH INFORMATION

DESCRIPTION

The Arched Maple metal bench gives you a classic, smooth look that blends perfectly with your project's design. Bench will be in black and include inscription on the seat back of the bench.

- Heavy Duty 1/4" Steel Construction
- Customizable Backrest
- Full-Seam Welds
- Singular Piece Design
- Rust-Resistant Feet
- Durable TGIC Powder Coated Finish
- Surface Mount

The body of this metal bench is cut from a single sheet of 1/4" cold rolled steel and is formed to shape as ONE PIECE to give it the heavy-duty strength your project needs. Bullet-proof, yet beautiful, the Maple Series metal benches have become the City Standard for cities all across the US. Customize this metal bench with your own completely custom laser cut logo. Our design staff is ready to help you brand your space with these great benches.

Bolt down the metal bench to prevent theft and relocation. Our trademark Rust-Resistant Feet makes it, so you aren't left with rust spots on the concrete where the bench is surface mounted. The entire metal bench is fully welded so you don't ever have to worry about it becoming rickety or falling apart. Our multi-stage finishing process gives you extra layers of durable color from the primer and TGIC powder coated topcoat. These coatings are UV stable to withstand constant outdoor exposure.

For use as Memorial Benches, we can easily incorporate a donor's name or organization and associated text. We can utilize both text and logos to make the bench give exactly the right impression. Send us your design or let our talented design team create one for you. We'd be honored to be a part of your project.
