2022 City of Washougal Community Survey

Executive Summary

Purpose

ETC Institute administered the *DirectionFinder®* survey for the City of Washougal during the fall of 2022. The survey was administered as part of the City's effort to assess citizen satisfaction with the quality of services. The information gathered from the survey will help the City align its priorities with the needs of residents. This is the fifth time that Washougal has administered a community survey with ETC Institute; the first survey was conducted in the summer of 2014.

Methodology

A six-page survey was mailed to a random sample of households in the City of Washougal. The survey was accompanied by a cover letter from the Mayor explaining the purpose of the survey and included a link for giving residents the option to complete the survey online. Of the households that received a survey, 513 completed the survey. The results for the random sample of 513 households have a 95% level of confidence with a precision of at least +/-4.3%.

The percentage of “don’t know” responses has been excluded from many of the graphs shown in this report to facilitate valid comparisons of the results from the City of Washougal with the results from other communities in the *DirectionFinder®* database. Since the number of “don’t know” responses often reflects the utilization and awareness of City services, the percentage of “don’t know” responses has been provided in the tabular data section of this report. When the “don’t know” responses have been excluded, the text of this report will indicate that the responses have been excluded with the phrase “who had an opinion.” Furthermore, the percentage of “neutral” responses (a rating of “3” on a 5-point scale) indicates that residents are, for the most part, satisfied with City services. They believe improvements could be made, but they do not have strong feelings of dissatisfaction for a particular service.

This report contains:

- a summary of the methodology for administering the survey and major findings
- charts and graphs
- benchmarking data that show how the results for the City of Washougal compare to other cities
- Importance-Satisfaction analysis
- tables that show the results for each question on the survey
- PowerPoint slides highlighting key survey findings
- a copy of the survey instrument

2022 City of Washougal Community Survey

Executive Summary

Major Findings

Satisfaction with City Services. Eighty-three percent (83%) of residents surveyed, who had an opinion, were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of fire, emergency medical and ambulance services; 72% were satisfied with the quality of police services, 61% were satisfied with the quality of customer service from City employees, and 59% were satisfied with the quality of City parks. Residents were least satisfied with effectiveness of economic development efforts (27%).

City Services That Should Receive the Most Emphasis Over the Next 2 Years. Based on the sum of their top three choices, the services that residents indicated should receive the most emphasis from the City over the next two years were: (1) quality of city water utilities, (2) maintenance of City streets, and (3) effectiveness of economic development efforts.

Perceptions of the City. Sixty-eight percent (68%) of residents surveyed, who had an opinion, indicated that they were satisfied (rating of 4 or 5 on a 5-point scale) with the overall feeling of safety in the City; 60% were satisfied with the overall quality of life in the City, and 54% were satisfied with the quality of services provided by the City. Residents were least satisfied with the availability of job opportunities (20%).

Parks and Recreation. Fifty-six percent (56%) of residents surveyed, who had an opinion, were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of facilities (picnic shelters, etc.) in Washougal parks. Residents were least satisfied with the number of City parks (47%).

Public Safety. Seventy-seven percent (77%) of residents surveyed, who had an opinion, were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of local fire protection and rescue services; 76% were satisfied with how quickly fire and rescue personnel respond, 71% were satisfied with the quality of local ambulance service, and 69% were satisfied with how quickly ambulance personnel respond. Residents were least satisfied with parking enforcement services (45%).

Communication. Thirty-eight percent (38%) of residents surveyed, who had an opinion, were satisfied (rating of 4 or 5 on a 5-point scale) with the overall quality of the city's website; 34% were satisfied with the availability of information about city programs/services, and 29% were satisfied with the City's efforts to keep residents informed about local issues. Residents were least satisfied with the level of public involvement in local decision making (19%).

Streets. Fifty-seven percent (57%) of residents surveyed, who had an opinion, were satisfied (rating of 4 or 5 on a 5-point scale) with the adequacy of City street lighting, and 54% were satisfied with the maintenance of major City streets. Residents were least satisfied with the condition of sidewalks in the City (39%).

Executive Summary

Code Enforcement. Twenty-eight percent (28%) of residents surveyed, who had an opinion, were satisfied (rating of 4 or 5 on a 5-point scale) with the enforcement of codes designed to protect public safety and health. Residents were least satisfied with the enforcement of the cleanup of litter and debris on private property (21%).

Customer Service. Forty-three percent (43%) of residents surveyed indicated they had contacted the City with a question, problem, or complaint during the past year. Of those, 74% felt it was “very easy” or “somewhat easy” to contact the person they needed to reach. With regard to various behaviors exhibited by City employees, 88% of residents surveyed, who had an opinion, indicated that employees were “always” or “usually” courteous and polite, and 71% said the employees “always” or “usually” gave prompt, accurate, and complete answers to questions.

Other Findings

- 52% of residents surveyed prefer to receive news and information about City programs, services, and events from a newsletter or other insert inside their utility bill envelope, and 49% get news and information from the City email update service.
- When asked about the City’s current pace of development, 66% of residents surveyed, who had an opinion, indicated that retail development was too slow, while 59% felt the pace of multi-family residential development was too fast.
- When asked about their expectations for various services, 73% of residents surveyed, who had an opinion, indicated that the level of service for the maintenance of infrastructure should be higher. With regard to fire, EMS and ambulance services, 64% believe the level of service provided by the City should stay the same.

Executive Summary

Opportunities for Improvement

In order to help the City identify opportunities for improvement, ETC Institute conducted an Importance-Satisfaction (I-S) Priorities Analysis. This analysis examined the importance that residents placed on each City service and the level of satisfaction with each service. By identifying services of high importance and low satisfaction, the analysis identified which services will have the most impact on overall satisfaction with City services over the next two years. If the City wants to improve its overall satisfaction rating, the City should prioritize improvements in services with the highest Importance-Satisfaction (I-S) ratings. Details regarding the methodology for the analysis are provided in Section 3 of this report.

Based on the results of the Importance-Satisfaction (I-S) Priorities Analysis, ETC Institute recommends the following:

Overall Priorities for the City by Major Category. The first level of analysis reviewed the importance of and satisfaction with major categories of City services. This analysis was conducted to help set the overall priorities for the City. Based on the results of this analysis, the major services that are recommended as the top three opportunities for improvement over the next two years in order to raise the City's overall satisfaction rating are listed below in descending order of the Importance-Satisfaction rating:

- Quality of City water utilities
- Effectiveness of economic development efforts
- Maintenance of City streets

Priorities within Departments/Specific Areas. The second level of analysis reviewed the importance of and satisfaction of services within departments and specific service areas. This analysis was conducted to help departmental managers set priorities for their department. Based on the results of this analysis, the services that are recommended as the top priorities within each department over the next two years are listed below:

- **Parks:** appearance and maintenance of existing city parks and quality of facilities
- **Public Safety:** visibility of police in the community
- **Communication:** efforts to inform about local issues, level of public involvement in local decision making, and quality of information about City programs/services
- **Streets:** condition of sidewalks in the City and maintenance of major City streets
- **Code Enforcement:** enforcing the cleanup of litter and debris on private property, enforcing codes designed to protect public safety and health, and enforcing the mowing and trimming of grass and weeds on private property

Benchmarking Analysis

Overview

ETC Institute's *DirectionFinder*® program was originally developed in 1999 to help community leaders use statistically-valid community survey data as a tool for making better decisions. Since November 1999, the survey has been administered in more than 500 cities and counties in 49 states. Most participating communities conduct the survey on an annual or biennial basis.

This report contains benchmarking data from two sources: (1) a national survey that was administered by ETC Institute during the fall of 2021 to a random sample of more than 9,000 residents in the continental United States and (2) a regional survey that was administered by ETC Institute during the fall of 2021 to a random sample of residents living in the Northwest Region of the United States. The Northwest Region includes the states of Washington, Oregon, Idaho, and Montana.

The charts on the following pages show how the results for the City of Washougal compare to the national average and the Northwest regional average. The blue bar shows the results for the City of Washougal, the red bar shows the national average, and the yellow bar shows the results for the Northwest Region.

Importance-Satisfaction Analysis

Importance-Satisfaction Analysis

Overview

Today, community leaders have limited resources which need to be targeted to activities that are of the most benefit to their citizens. Two of the most important criteria for decision making are (1) to target resources toward services of the highest importance to citizens; and (2) to target resources toward those services where citizens are the least satisfied.

The Importance-Satisfaction (I-S) rating is a unique tool that allows public officials to better understand both of these highly important decision-making criteria for each of the services they are providing. The Importance-Satisfaction (I-S) rating is based on the concept that public agencies will maximize overall customer satisfaction by emphasizing improvements in those areas where the level of satisfaction is relatively low, and the perceived importance of the service is relatively high.

The rating is calculated by summing the percentage of responses for items selected as the first, second, and third most important services for the City to emphasize over the next two years. The sum is then multiplied by 1 minus the percentage of respondents who indicated they were positively satisfied with the City's performance in the related area (the sum of the ratings of 4 and 5 on a 5-point scale excluding "Don't Know" responses). "Don't Know" responses are excluded from the calculation to ensure the satisfaction ratings among service categories are comparable.

$$\text{I-S Rating} = \text{Importance} \times (1 - \text{Satisfaction})$$

Example of the Calculation

Respondents were asked to identify the major categories of City services that were most important to their household. Nearly half (48.9%) of the respondent households selected "*overall quality of city water utilities*" as one of the most important services for the City to emphasize.

With regard to satisfaction, 33% of respondents surveyed rated "*overall quality of city water utilities*" as a "4" or "5" on a 5-point scale (where "5" means "Very Satisfied") excluding "Don't Know" responses. The I-S rating was calculated by multiplying the sum of the most important percentages by one minus the sum of the satisfaction percentages. In this example, 48.9% was multiplied by 67% (1-0.33). This calculation yielded an I-S rating of 0.3276, which ranked first out of eleven major categories of City services analyzed.

Importance-Satisfaction Analysis

The maximum rating is 1.00 and would be achieved when 100% of the respondents select an item as one of their top three choices of importance and 0% indicate they are positively satisfied with the delivery of the service.

The lowest rating is 0.00 and could be achieved under either of the following two situations:

- If 100% of the respondents were positively satisfied with the delivery of the service
- If none (0%) of the respondents selected the service as one of the three most important areas.

Interpreting the Ratings

Ratings that are greater than or equal to 0.20 identify areas that should receive significantly more emphasis. Ratings from 0.10 to 0.20 identify service areas that should receive increased emphasis. Ratings less than 0.10 should continue to receive the current level of emphasis.

- Definitely Increase Emphasis ($I-S > 0.20$)
- Increase Current Emphasis ($I-S = 0.10 - 0.20$)
- Maintain Current Emphasis ($I-S < 0.10$)

Importance-Satisfaction Analysis

Importance-Satisfaction Matrix Analysis

The Importance-Satisfaction rating is based on the concept that public agencies will maximize overall customer satisfaction by emphasizing improvements in those areas where the level of satisfaction is relatively low, and the perceived importance of the service is relatively high. ETC Institute developed an Importance-Satisfaction Matrix to display the perceived importance of major services that were assessed on the survey against the perceived quality of service delivery. The two axes on the matrix represent Satisfaction (vertical) and relative Importance (horizontal).

The I-S (Importance-Satisfaction) matrix should be interpreted as follows.

- **Continued Emphasis (above average importance and above average satisfaction).** This area shows where the City is meeting customer expectations. Items in this area have a significant impact on the customer's overall level of satisfaction. The City should maintain (or slightly increase) emphasis on items in this area.
- **Exceeding Expectations (below average importance and above average satisfaction).** This area shows where the City is performing significantly better than customers expect the City to perform. Items in this area do not significantly affect the overall level of satisfaction that residents have with City services. The City should maintain (or slightly decrease) emphasis on items in this area.
- **Opportunities for Improvement (above average importance and below average satisfaction).** This area shows where the City is not performing as well as residents expect the City to perform. This area has a significant impact on customer satisfaction, and the City should DEFINITELY increase emphasis on items in this area.
- **Less Important (below average importance and below average satisfaction).** This area shows where the City is not performing well relative to its performance in other areas; however, this area is generally considered to be less important to residents. This area does not significantly affect overall satisfaction with City services because the items are less important to residents. The agency should maintain current levels of emphasis on items in this area.

Q19. Washington voters approved Initiative 502 in November 2012 to allow for the production, processing and retail sales of recreational marijuana. Cities have discretion to regulate or prohibit such uses within their jurisdiction. These uses have been prohibited in Washougal. Pursuant to State rules, the City could allow one marijuana retail store to be located within the City. Cities that allow production, processing and retail sales of marijuana receive a portion of the generated excise tax from the retail sales, which can be used for government services, including public safety. For example, in 2021 the City of Battle Ground received \$46,000. Please indicate if you support allowing the following uses in Washougal by circling YES or NO below.

Q20. In 2017, the City Council passed an ordinance restricting the use of personal fireworks within City limits to "Safe and Sane" fireworks (which are those that do not fly, explode, or travel more than one foot into the air or more than six feet on the ground). These restrictions have been in effect since New Year's Eve 2018. Prior to enacting this restriction, all fireworks legal in the State of Washington were legal in Washougal, with limits on the times when they could be used. Vancouver has a complete ban on all personal fireworks. Camas allows personal fireworks that are allowed by the State of Washington, with limits on the times they can be used. Survey Instrument

Dear Washougal Resident,

Your input on the enclosed survey is extremely important. The City of Washougal is conducting a survey of residents to gather information about city priorities and the quality of city programs and services. The survey, conducted every two years, is this year part of our process to develop a new updated strategic plan for the community, and to assist us in making important decisions over the next several months. To assist us in aligning the city's priorities with the needs of our residents, *we need to know what you think.*

We appreciate your time. We realize this survey takes some time to complete, but every question is important. The time you invest in this survey will influence decisions we must make regarding the future of our city.

Please take a few minutes to complete and return this survey in the next few days. A postage-paid return envelope, addressed to ETC Institute, has been provided for your convenience. You may also complete the survey on-line by going to WashougalSurvey.com.

We have again selected ETC Institute as our partner for this project because of its outstanding record of performance in working with communities nationwide. ETC will compile the results and present a report to the city in early November. The report will be a valuable resource as we work to provide you with the most responsive government possible. Look for a summary of the survey results on the city's website, www.cityofwashougal.us.

If you have any questions, please call Rose Jewell, Community Engagement Manager, at (360) 835-8501 ext. 602. On behalf of the City Council, thank you for your participation in this important process.

Sincerely,

David Scott

19. Washington voters approved Initiative 502 in November 2012 to allow for the production, processing and retail sales of recreational marijuana. Cities have discretion to regulate or prohibit such uses within their jurisdiction. These uses have been prohibited in Washougal. Pursuant to State rules, the City could allow one marijuana retail store to be located within the City. Cities that allow production, processing and retail sales of marijuana receive a portion of the generated excise tax from the retail sales, which can be used for government services, including public safety. For example, in 2021 the City of Battle Ground received \$46,000. Please indicate if you support allowing the following uses in Washougal by circling YES or NO below.

(A) Marijuana Production	YES	NO
(B) Marijuana Processing	YES	NO
(C) Marijuana Retail Sales	YES	NO

20. In 2017, the City Council passed an ordinance restricting the use of personal fireworks within city limits to "Safe and Sane" fireworks (which are those that do not fly, explode, or travel more than one foot into the air or more than six feet on the ground). These restrictions have been in effect since New Year's Eve 2018. Prior to enacting this restriction, all fireworks legal in the State of Washington were legal in Washougal, with limits on the times when they could be used. Vancouver has a complete ban on all personal fireworks. Camas allows personal fireworks that are allowed by the State of Washington, with limits on the times they can be used. Knowing this, which of the following statements reflects your preference regarding fireworks restrictions?

- (1) I support the current restriction for safe and sane fireworks
- (2) I would support a complete ban on the use of personal fireworks
- (3) I would support overturning the current restriction and restoring the previous allowance of all legal personal fireworks with limits on the times they can be used
- (9) Don't know
